

Amendments to the Specification

Please amend footnote 3 of Table 1 on page 9 as indicated below.

³Example 2 [[3]]: fuel, 125 ppm by wt. glycerol monooleate (GMO) and 125 ppm by wt. diethoxylated tallowamine (amine), 116 ppm by wt. Mannich reaction product (detergent, from 1,000 mol. wt. polyisobutylene alkylated phenol, formaldehyde and ethylenediamine), and 78 ppm by wt. polyetheramine (detergent, from C₁₂₋₁₅ linear alcohol reacted with 20-24 moles of propylene oxide followed by reaction with acrylonitrile then hydrogenation).
